

# **Guideline to Install UiPath Studio**

1. Installing the Studio.

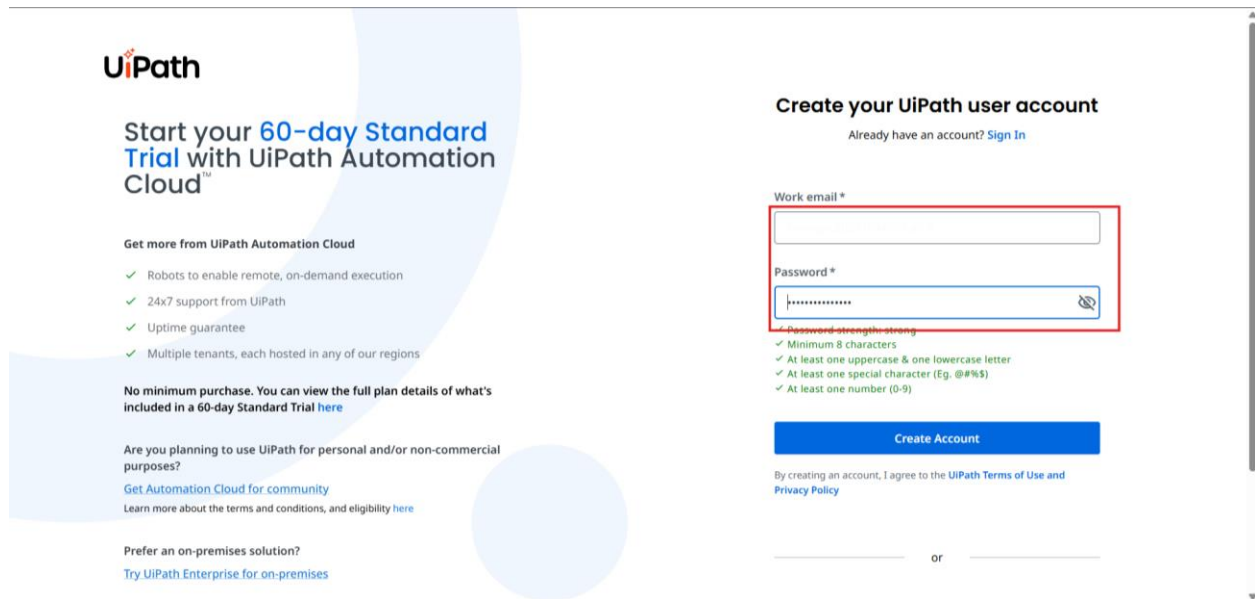

2. Go to URL - <https://www.uipath.com/>

3. Click on “Try Uipath Free” button.

#### 4. Sign Up using your UOM email.

The screenshot shows the UiPath sign-up page. On the left, there's a promotional banner for a 60-day Standard Trial. On the right, the 'Create your UiPath user account' form is visible. The form includes fields for 'Work email \*' and 'Password \*'. The 'Work email \*' field is highlighted with a red box. Below the password field, there are password strength requirements listed. At the bottom of the form, there is a blue 'Create Account' button, which is also highlighted with a red box. Below the button, there is a link to the Terms of Use and Privacy Policy.

6. Enter the OTP that you receive to your email and click on “Continue”.

The screenshot shows the UiPath verification screen. On the left is a blue sidebar with the UiPath logo and the text "Build great things with us." The main content area has a white background. At the top, there is an icon of an open envelope. Below it, the heading "Enter your verification code to continue" is displayed, followed by a subtext: "We have sent a verification code to your email. Check your spam folder if you're unable to find it." Below this, the label "Verification Code" is shown above a row of six input boxes containing the digits 4, 9, 9, 4, 1, and 3. A red rectangular box highlights the "Continue" button, which is blue with white text. Below the button, there is a red link that says "Send email again (25)". At the bottom, there is a link that says "Need to change your email address? Start over".

7. Fill the following form and click on “Next” button. (Fill the Business/Organization Name as **UOM** and the Job Title as **Developer**.)

The screenshot shows the UiPath registration form. On the left is a blue sidebar with the UiPath logo and the text "Build great things with us." The main content area has a white background. At the top, the heading "Tell us a bit about yourself" is displayed. Below it, there are four input fields: "Display name \*", "Country/Region \*" (with a dropdown arrow), "Business/Organization Name \*", and "Job Title \*". Below these fields, there is a checkbox labeled "Send me information about UiPath products, events, and promotions. See [Privacy Policy](#)". A red rectangular box highlights the "Next" button, which is blue with white text.

8. Fill the Data storing Region as **Singapore** and click “Create Organization” button.

**Build great things with us.**

### What should we call your cloud organization?

Cloud Organization Name \*

Your organization is an Automation Cloud workspace where you can invite, manage, and collaborate with other members of your team or company

Data Storage Region \*

Singapore

IXP: Generative Extraction for unstructured & complex documents

10. Click on “Download” button.

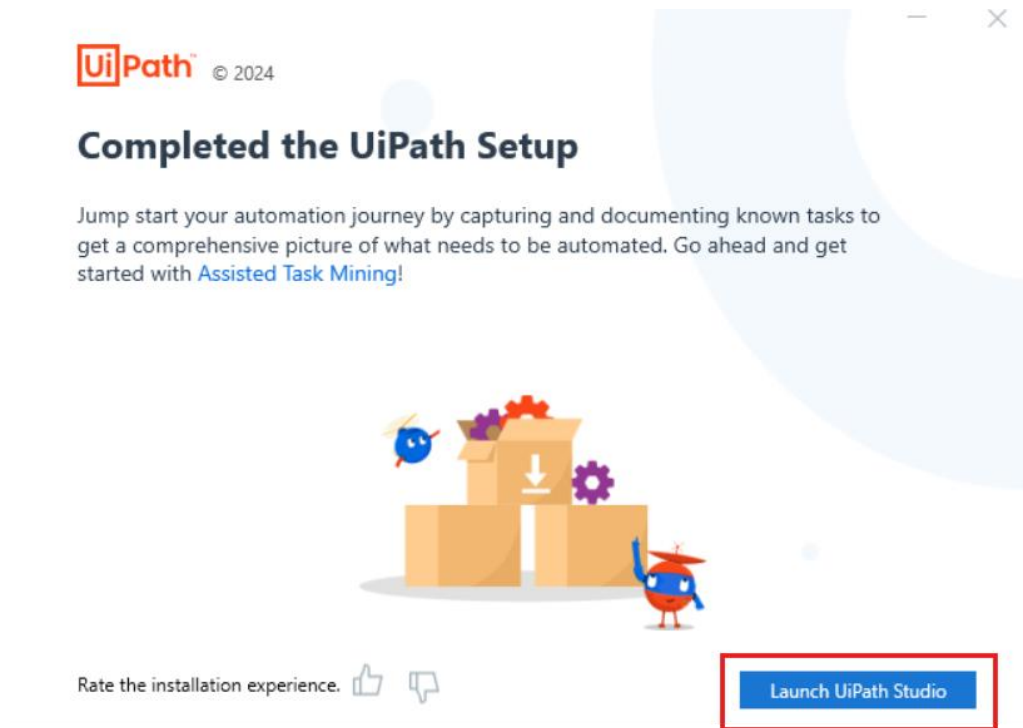

11. Run the Downloaded Executable.

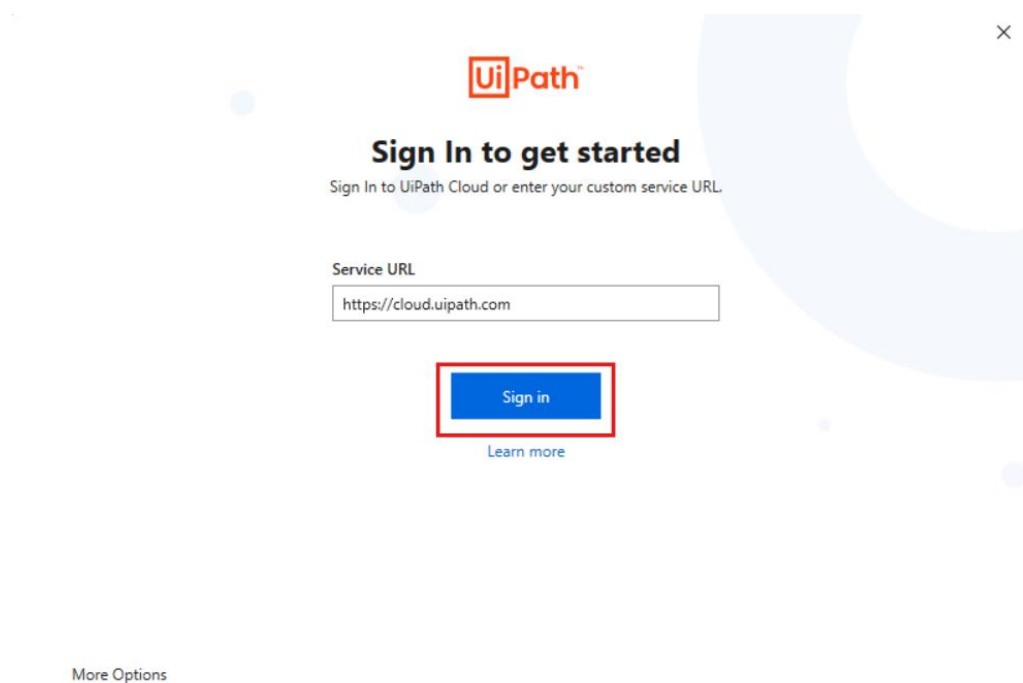

12. Click on the Quick (recommended for Community Users) checkbox.

13. Check Launch UiPath Studio and click finish.

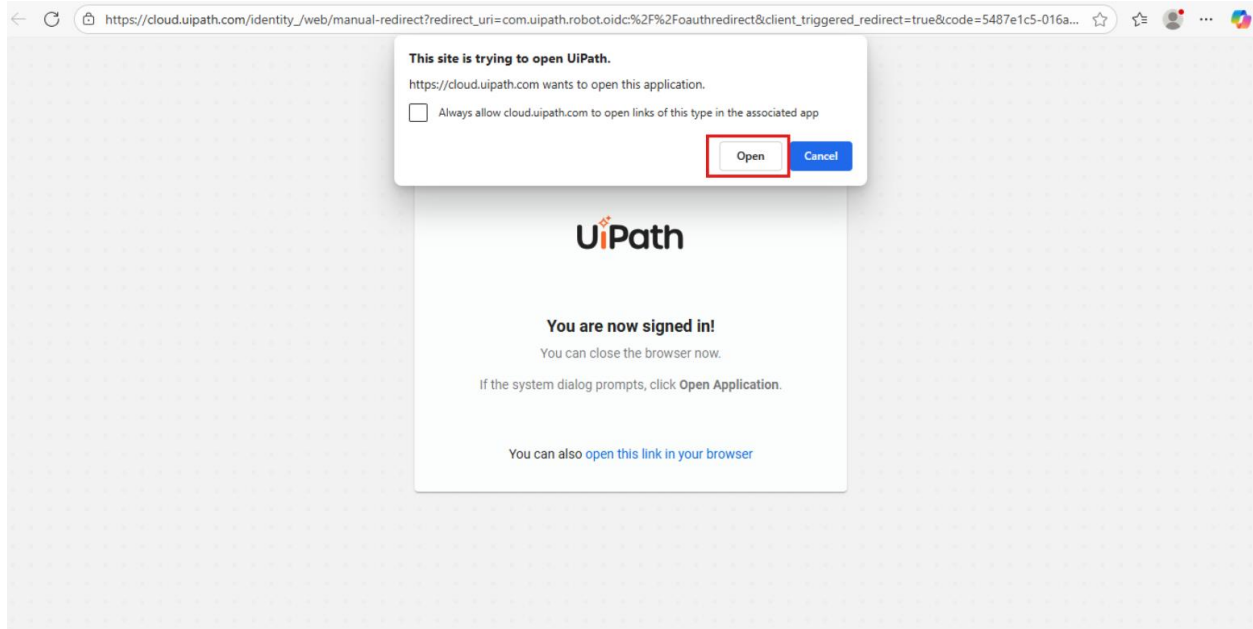

14. Click "Sign In".

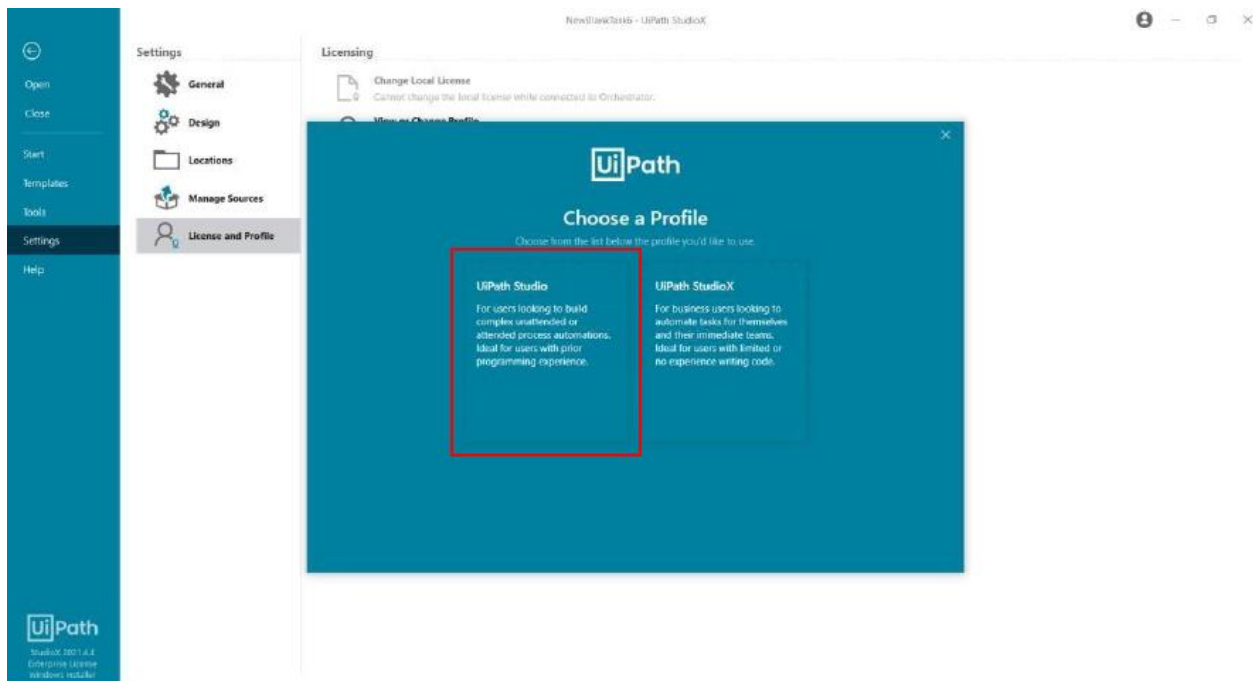

15. You will be redirected to your browser with a popup message. Click on “Open”.

16. Select your Tenant and Continue. (UOM)

17. Please use studio profile to develop the workflow. You can check the profile from left bottom.

**Note:**

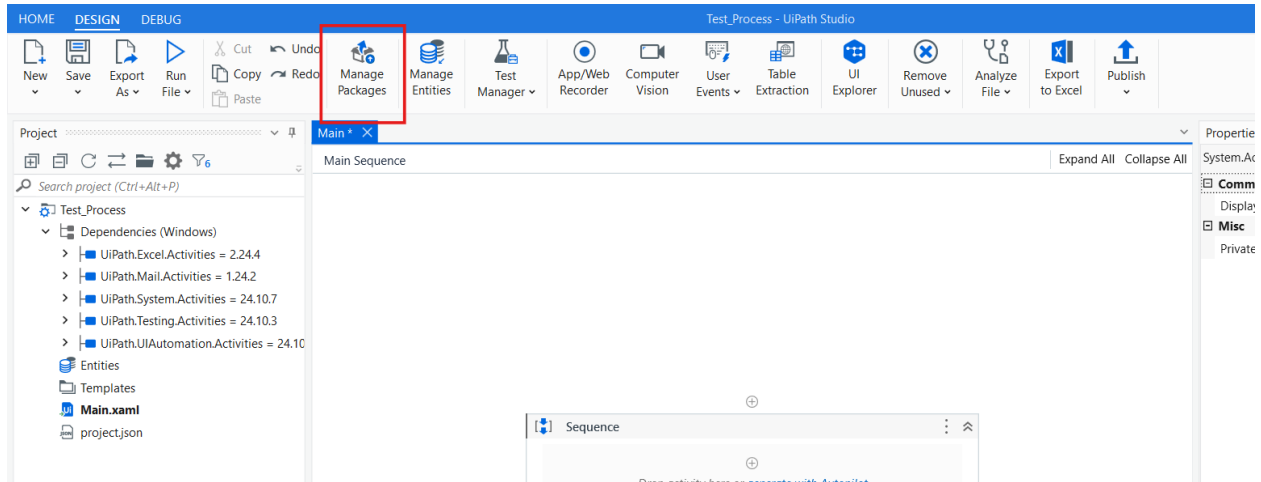

***If you are not in the correct profile, you can change navigating using below path.***

***Home -> Settings -> License and Profile -> view or change profile***

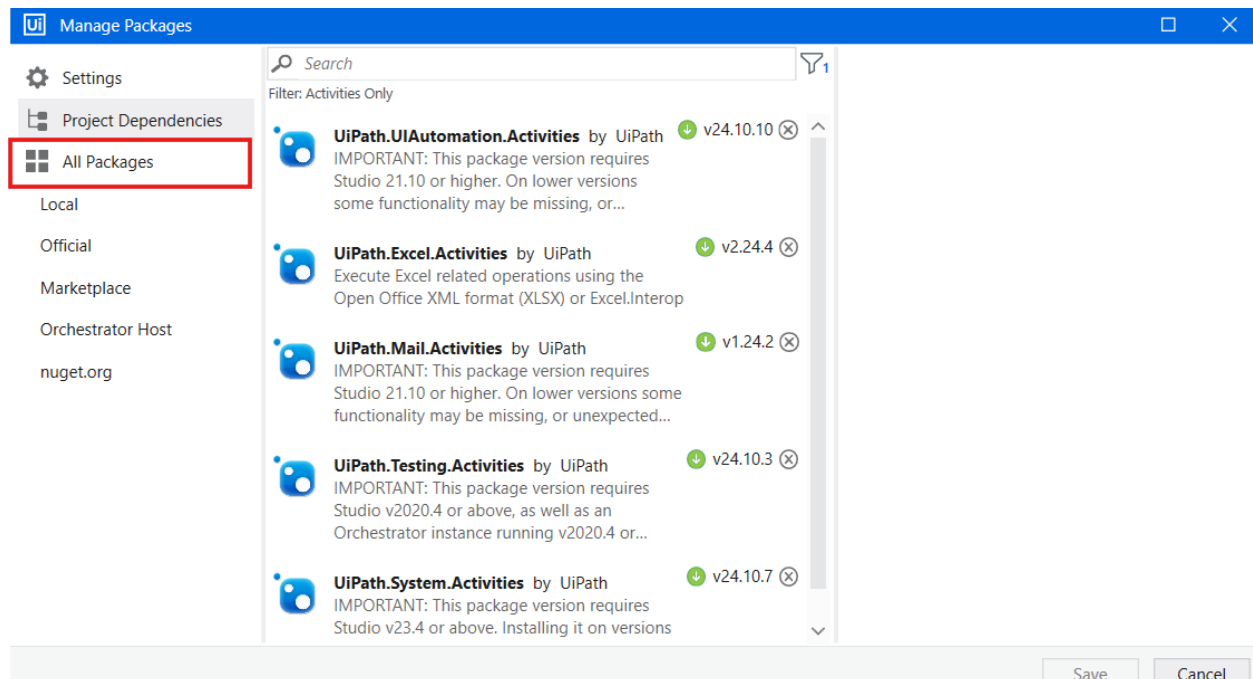

***Then select studio***

## 2. Installing Packages.

1. Click on “Manage Packages”.

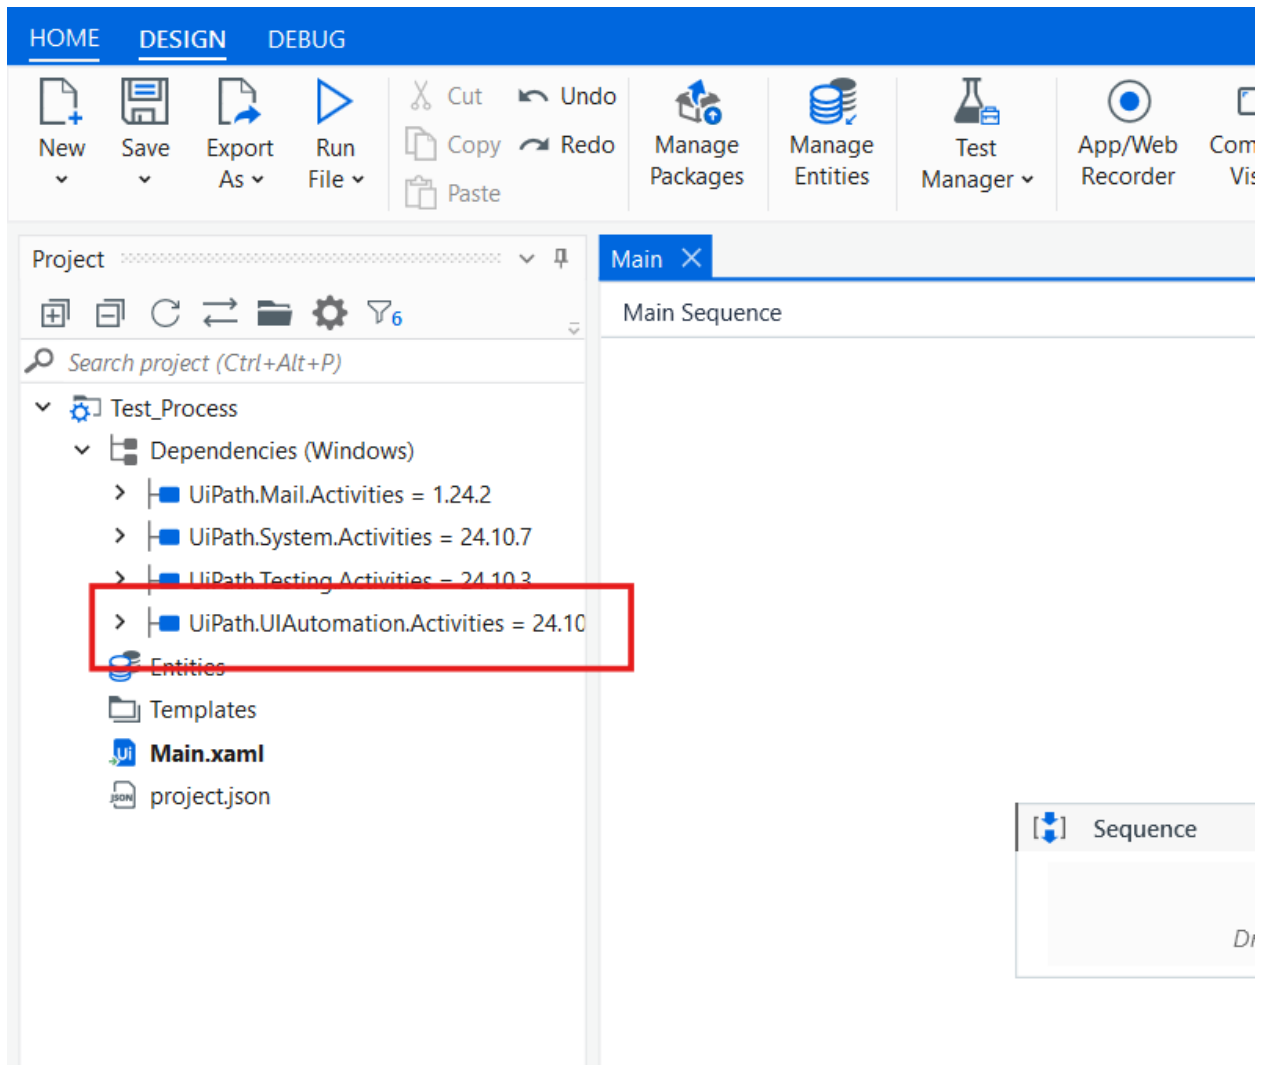

2. Go to “All Packages”.

3. Check if the following packages are available dependencies in your project.

### Uipath.Excel.Activities

### Uipath.UIAutomation.Activities

4. If not, Search the packages in the search bar, click on “Install” and then “Save”.
